PROFESSIONAL SUMMARY

IT Coordinator and Senior Project Manager with 14+ years in mission-critical systems for payments, billing, HR Tech, Legal Tech and telecom. Coordinates engineering squads and vendors end to end across LATAM, US, UK, South Africa and India: planning, fixed-scope delivery governance, 24/7 ITIL incident management, DevSecOps compliance and executive reporting. Combines a hands-on Java, Spring Boot, Angular and .NET background with ITSM discipline, Databricks/Spark data platforms and Agile delivery (SAFe, PI Planning). Based in Brazil and ready for remote work.

KEY ACHIEVEMENTS

- Eliminated 1,200+ vulnerabilities and reduced active security risk by 90% in 6 months across 100+ applications while maintaining PCI-DSS and LGPD compliance.
- 100% transactional accuracy for R$500M+ per month in payment flows through a Databricks/Spark migration under BACEN and FEBRABAN regulation.
- 100% transactional billing accuracy and drastically reduced MTTR with 24/7 Level 3 ITIL operations and Dynatrace/Datadog observability.
- Eliminated vendor lock-in with vendor-to-internal insourcing programs across HR Tech, Legal Tech AI, EdTech and core billing operations.

CORE COMPETENCIES

IT Coordination and Operations: IT Team Coordination, Squad and Vendor Management, Fixed-Scope Delivery Governance, Insourcing, 24/7 L2/L3 Incident Management, ITIL, ITSM, ServiceNow, Remedy, Clarify CRM, SLA Governance, MTTR, Root Cause Analysis, Knowledge Transfer, Lean Six Sigma Yellow Belt, Executive Reporting

Data and Platforms: Databricks, Apache Spark, MLOps, Data Lakehouse, Datadog, Dynatrace, Billing Systems, Oracle, PL/SQL, Pentaho ETL, Power BI, Tableau

Security and Compliance: DevSecOps, Veracode, Rapid7, Wiz, Checkmarx, PCI-DSS, LGPD, BACEN, FEBRABAN

Engineering and Cloud: Java, Spring Boot, Angular, JavaScript, .NET, OutSystems (Low-Code), Salesforce, Unix/Linux, Shell Script, CI/CD, GitHub Actions, AWS (migration), Azure, GCP, Docker, Kubernetes, Tuxedo, WebLogic

Agile and Tools: Scrum (PSM III), SAFe, PI Planning, Kanban, OKRs, DORA Metrics, Jira, Azure DevOps, Confluence, Figma, GitHub Copilot, Generative AI

PROFESSIONAL EXPERIENCE

Agentic Product Owner | Data Centric | Serasa Experian | Pato Branco, PR | Aug 2026 - Present

- Own technical product discovery and execution for B2B payment flows, using Databricks, Amplitude and Datadog data to map real user friction points and prioritize data-backed features.
- Speed up engineering and product definition cycles with GenAI tools (Claude, ChatGPT, Cursor, GitHub Copilot).

IT Coordinator | Agentic Tech Project Manager | Serasa Experian (Flexpag) | Recife, PE | Nov 2024 - Aug 2026

- Led key engineering projects for a digital payments and billing fintech, managing technical backlogs in lean environments without a formal Product Owner, including a Hub integration with a White Label frontend and API integrations with clients.
- Built and ran a DevSecOps guardrail framework across 100+ applications with Veracode, Rapid7 and Wiz within a cybersecurity remediation and AWS cloud migration program, eliminating 1,200+ vulnerabilities and reducing security risk by 90% in 6 months while maintaining PCI-DSS and LGPD compliance.
- Orchestrated end-to-end migration of legacy analytics to Databricks and Apache Spark with MLOps, delivering 100% transactional accuracy for R$500M+ per month under strict BACEN and FEBRABAN constraints.

Agile Delivery Manager | Serasa Experian (Shared Services) | São Carlos, SP | Apr 2021 - Nov 2024

- Managed global delivery across UK, US and LATAM, coordinating PI Planning and Agile governance for 5 international squads (35+ members) and optimizing flow metrics (velocity, throughput, lead time, dependencies).
- Oversaw high-volume transactional billing platforms and 24/7 Level 3 ITIL incident management, guaranteeing 100% transactional accuracy and drastically reducing MTTR.
- Led squads and vendor hiring under fixed-scope contracts for enterprise HR platforms (HCM, total compensation, OutSystems low-code), eliminating third-party dependencies and improving executive visibility.

- Managed backlog, scope baseline and execution of AI-driven Legal Tech applications under fixed-scope contracts, cutting legal document review time.
- Led rollout and training of GitHub Copilot and GenAI workspaces across engineering units, accelerating SDLC delivery speed by up to 45%.

Full Stack Engineer | Serasa Experian | São Carlos, SP | Mar 2016 - Apr 2021

- Executed a vendor-to-internal insourcing transition for core system operations, eliminating vendor lock-in, reducing third-party operational costs and retaining critical domain knowledge in-house.
- Delivered billing engineering and 24/7 L3 support with Dynatrace and Datadog observability, maintaining 100% transactional billing accuracy and reducing MTTR.
- Led modernization of legacy mainframe components into cloud-native microservices (Java, Spring Boot, .NET) with CI/CD pipelines and automated security checks in release flows.
- Built self-service administrative portals and integrated Salesforce and OutSystems, reducing manual support requests and ensuring interoperability.

Technical Support Specialist | Amdocs | São Carlos, SP | Jul 2013 - Mar 2016

- Delivered global Tier 2/3 production support and database tuning for telecom BSS/OSS platforms, managing L2/L3 incidents with engineering hubs in India and the US (Remedy, Clarify CRM) and keeping strict SLA compliance through root cause analysis.
- Automated Unix Shell Script and PL/SQL routines to optimize Oracle DB batch processing, and tuned Tuxedo and WebLogic middleware for high availability.

Product Owner | EdTech Startup | XBot | São Carlos, SP | Nov 2010 - Jul 2013

- Defined requirements and roadmaps for educational robotics and industrial safety simulators, and aligned go-to-market across 12 distributed sales teams in Brazil, generating R$4 million in sales over 3 years.

International Consultant (French Contractor) | Bernardin Consultants | Cotia, SP | Jan 2010 - Dec 2010

- Conducted B2B market prospecting, financial feasibility and competitive analysis for European corporations entering Latin America, as liaison to Brazilian entities in defense, precision industry and military aviation.

CERTIFICATIONS

Professional Scrum Master III (PSM III) | Lean Six Sigma Yellow Belt | Certified Angular Developer | Certified JavaScript Developer | Datadog - Tagging Best Practices | Datadog - Dashboards

HONORS AND PUBLICATIONS

Honors and Awards: Knowledge transfer and modernization | Recognition for agile work to support IT systems | Agile Coach

Publications: A block programming interface for educational mobile robots | Retrofit of reclosers in electric power grids

EDUCATION

Federal University of São Carlos | Postgraduate in Software Engineering, Web, Java and Databases | 2018 - 2019

Centro Universitário Central Paulista (UNICEP) | Bachelor's Degree in Electrical Engineering | 2005 - 2011

LANGUAGES

English (Full Professional), Spanish (Elementary), Chinese (Elementary)
