PROFESSIONAL SUMMARY

Senior Project Manager and Product Delivery Lead with 14+ years managing global engineering squads and delivering 20+ mission-critical initiatives across LATAM, US, UK, South Africa and India. Leads Agile delivery, PI Planning and cross-functional technical alignment across enterprise cloud migrations, Databricks/Spark data lakehouses, DevSecOps governance and AI-driven SDLC acceleration. Builds agentic delivery workflows with MCP, Databricks, Amplitude, Datadog and GenAI tools (Claude, ChatGPT, Cursor, GitHub Copilot). Industries: Payments, HR Tech, Legal Tech, Billing, Low-Code, Cybersecurity, 24/7 Support, Customer Success and data, cloud, legacy and mainframe migrations. Open to nearshore, offshore and international roles.

KEY ACHIEVEMENTS

- Boosted SDLC delivery speed by up to 45% by scaling GitHub Copilot and GenAI workspaces across engineering teams.
- Eliminated 1,200+ vulnerabilities and cut active security risk by 90% in 6 months across 100+ applications (Veracode, Rapid7, Wiz) while maintaining PCI-DSS and LGPD compliance.
- Delivered 100% transactional accuracy for R$500M+ per month in payment flows through a Databricks/Spark lakehouse migration with MLOps under BACEN and FEBRABAN rules.
- Managed 5 distributed international squads (35+ members), synchronizing PI Planning and aligning C-level OKRs.

CORE COMPETENCIES

Program and Project Management: Technical Program Management, Agile Delivery, PI Planning, SAFe, OKRs, Roadmaps, Fixed-Scope Delivery Governance, Vendor Management, Insourcing, Remote Team Management, Executive Alignment, Digital Transformation, SDLC

AI and Agentic Delivery: Agentic Workflows, MCP (Model Context Protocol), Generative AI, Claude, ChatGPT, Cursor, GitHub Copilot, AI-Accelerated SDLC, Amplitude

Agile, Delivery and Operations: Scrum (PSM III), SAFe, Kanban, DORA Metrics, Jira, Azure DevOps, Monday.com, Confluence, Notion, Figma, Lean Six Sigma Yellow Belt, ITIL, 24/7 L3 Incident Management, MTTR, ServiceNow

Data and Engineering: Databricks, Apache Spark, MLOps, Data Lakehouse, Java, Spring Boot, Angular, JavaScript, .NET, OutSystems (Low-Code), Salesforce, Shell Script, PL/SQL, Oracle

Cloud, Security and Observability: AWS (migration), Azure, GCP, Docker, Kubernetes, CI/CD, DevSecOps, Veracode, Rapid7, Wiz, Checkmarx, PCI-DSS, LGPD, BACEN, FEBRABAN, Datadog, Dynatrace

PROFESSIONAL EXPERIENCE

Agentic Product Owner | Data Centric | Serasa Experian | Pato Branco, PR | Aug 2026 - Present

- Orchestrate technical product discovery and execution for B2B payment flows, using agentic workflows with MCP, Databricks, Amplitude and Datadog to map real user friction points.
- Accelerate engineering and product definition cycles with GenAI tools (Claude, ChatGPT, Cursor, GitHub Copilot).
- Optimize usability and payment recurrence with an essentialist approach, focusing strictly on data-backed features that resolve real usability problems.

IT Coordinator | Agentic Tech Project Manager | Serasa Experian (Flexpag) | Recife, PE | Nov 2024 - Aug 2026

- Led key engineering projects for a digital payments and billing fintech, managing technical backlogs in lean environments without a formal Product Owner, including a Hub integration with a White Label frontend and API integrations with clients.
- Built and ran a DevSecOps guardrail framework across 100+ applications with Veracode, Rapid7 and Wiz as part of a cybersecurity remediation and AWS cloud migration program, eliminating 1,200+ vulnerabilities and reducing security risk by 90% in 6 months.
- Orchestrated end-to-end migration of legacy analytics to Databricks and Apache Spark with MLOps (data lakehouse), delivering 100% transactional accuracy for R$500M+ per month under BACEN and FEBRABAN regulation.

Agile Delivery Manager | Serasa Experian (Shared Services) | São Carlos, SP | Apr 2021 - Nov 2024

- Coordinated PI Planning and SAFe governance across 5 international squads (35+ members) in LATAM, US, UK and South Africa, synchronizing C-level OKRs and optimizing flow metrics (velocity, throughput, lead time, dependencies).

- Led rollout, training and enablement of GitHub Copilot and GenAI workspaces across engineering units, accelerating SDLC delivery speed by up to 45%.
- Managed backlog, scope baseline and execution of AI-driven Legal Tech applications under fixed-scope contracts, automating legal document reviews and cutting processing time.
- Led squads and vendor hiring under fixed-scope contracts for enterprise HR platforms (HCM, total compensation, OutSystems low-code), eliminating third-party dependencies.
- Oversaw high-volume billing platforms and 24/7 Level 3 ITIL incident management with 100% transactional accuracy and reduced MTTR; directed Customer Success portals and a design system with Figma.

Full Stack Engineer | Serasa Experian | São Carlos, SP | Mar 2016 - Apr 2021

- Delivered full-stack Java, Spring and cloud engineering and mainframe migration for enterprise billing and CRM platforms in the Core Financial Operations unit.
- Led modernization of legacy mainframe components into cloud-native microservices (Java, Spring Boot, .NET) with CI/CD pipelines and automated security checks in release flows.
- Provided 24/7 L3 support with Dynatrace and Datadog observability, keeping 100% transactional billing accuracy and reducing MTTR.
- Built self-service portals integrated with Salesforce and OutSystems, and executed a vendor-to-internal insourcing transition for core operations, eliminating vendor lock-in.

Technical Support Specialist | Amdocs | São Carlos, SP | Jul 2013 - Mar 2016

- Delivered global Tier 2/3 production support and database tuning for telecom BSS/OSS platforms, managing L2/L3 incidents with engineering hubs in India and the US (Remedy, Clarify CRM) and keeping strict SLA compliance through root cause analysis.
- Automated Unix Shell Script and PL/SQL routines to optimize Oracle DB batch processing, and tuned Tuxedo and WebLogic middleware for high availability.

Product Owner | EdTech Startup | XBot | São Carlos, SP | Nov 2010 - Jul 2013

- Defined requirements and roadmaps for educational robotics and industrial safety simulators, and aligned go-to-market across 12 distributed sales teams in Brazil, generating R$4 million in sales over 3 years.

International Consultant (French Contractor) | Bernardin Consultants | Cotia, SP | Jan 2010 - Dec 2010

- Conducted B2B market prospecting, financial feasibility and competitive analysis for European corporations entering Latin America, as liaison to Brazilian entities in defense, precision industry and military aviation.

SELECTED PROJECTS

- AI portfolio chat (#askToTPM_agentic): CV-grounded Q&A prototype that offers this CV for download (React, Vite, GitHub Pages).

CERTIFICATIONS

Professional Scrum Master III (PSM III) | Lean Six Sigma Yellow Belt | Certified Angular Developer | Certified JavaScript Developer | Datadog - Tagging Best Practices | Datadog - Dashboards

HONORS AND PUBLICATIONS

Honors and Awards: Knowledge transfer and modernization | Recognition for agile work to support IT systems | Agile Coach

Publications: A block programming interface for educational mobile robots | Retrofit of reclosers in electric power grids

EDUCATION

Federal University of São Carlos | Postgraduate in Software Engineering, Web, Java and Databases | 2018 - 2019

Centro Universitário Central Paulista (UNICEP) | Bachelor's Degree in Electrical Engineering | 2005 - 2011

LANGUAGES

English (Full Professional), Spanish (Elementary), Chinese (Elementary)
