PROFESSIONAL SUMMARY

IT Coordinator at Serasa Experian with 10+ years in mission-critical systems across Fintech, Big Data, Cloud and Telecom. Coordinates data, payments and security squads end to end: planning, squad and vendor management, incident, change and problem governance, compliance and executive reporting. Combines a hands-on Java, Angular, .NET and Oracle background with ITSM discipline (ServiceNow, ITIL), DevSecOps and Agile delivery. Results include vulnerabilities reduced from 1,200 to 300, 40% faster ETL processing and 99.9% uptime in critical billing systems. Based in Brazil and ready for remote work.

KEY ACHIEVEMENTS

- 1,200 to 300 total vulnerabilities in 9 months across 110 Java/Angular applications; 47 to 3 critical/high findings.
- 80M+ transactions per day and R$500M+ monthly reconciliation under structured monitoring.
- 40% reduction in ETL processing time after the Pentaho to Databricks and Tableau to Power BI migration.
- 99.9% uptime in critical billing systems; daily incidents reduced from 300 to 100.

CORE COMPETENCIES

IT Coordination and Operations: IT Team Coordination, Squad and Vendor Management, Incident, Change and Problem Management, ITSM, ITIL, ServiceNow, Zendesk, Freshdesk, SLA and KPI Management, Knowledge Management, Lean Six Sigma (Yellow Belt), Continuous Improvement, Executive Reporting

Data and Platforms: Databricks, Spark, Pentaho ETL, Power BI, Tableau, Datadog, Dynatrace, Billing Systems, SAP, Oracle ERP, TOTVS Protheus (delivery support)

Security and Compliance: DevSecOps, Veracode, Checkmarx, Rapid7, PCI-DSS, BACEN, LGPD, FEBRABAN

Engineering and Cloud: Java, Spring Boot, Angular, .NET, Salesforce, OutSystems, Unix/Linux, Shell Script, PL/SQL, Oracle, CI/CD, GitHub Actions, Docker, Kubernetes, AWS, Azure, GCP (PM level)

Agile and Tools: Scrum, SAFe, Kanban, OKRs, DORA Metrics, Jira, Azure DevOps, Confluence, Slack, MS Teams, Power Automate, GitHub Copilot, Generative AI

PROFESSIONAL EXPERIENCE

IT Coordinator (Fintech M&A, Payments and Data) | Serasa Experian | Brazil | Nov 2024 - Present

- Coordinate data, payments and cybersecurity squads, owning planning, delivery governance, SLAs and executive reporting after the acquisition by Serasa.
- Led DevSecOps remediation across 110 Java/Angular applications with Veracode, Rapid7 and CI/CD, reducing total vulnerabilities from 1,200 to 300 in 9 months and critical/high findings from 47 to 3 (about 93%).
- Defined ownership by value stream (data engineering, processing and analysis) and implemented monitoring with Datadog and Teams/Power Automate alerts, sustaining 80M+ transactions per day and R$500M+ monthly reconciliation.
- Lead the migration of legacy analytics from Pentaho to Databricks/Spark and from Tableau to Power BI, cutting ETL processing time by 40% while keeping operations stable through high team turnover.
- Support the integration into a payments gateway platform for utilities with regulated Pix, Nubank and other Bacen-compliant payment flows and PCI-DSS compliance.

Agile Delivery Manager (HR, Legal, CS, Sales, Billing) | Serasa Experian | London, UK | Apr 2021 - Nov 2024

- Led five cross-functional squads and seven engineers across London and the USA, aligning roadmaps with corporate OKRs and controlling Agile KPIs (velocity and throughput).
- Increased sprint velocity by 35% and reduced cross-squad blockers by 50% with Scrum-of-Scrums, SAFe practices and Jira/ServiceNow dashboards for executive visibility.
- Coordinated an AI smart-search and triage workflow for LegalTech that reduced legal operation SLA by 12%.
- Synchronized the customer care backlog with operations and support, improving prioritization and handoffs across product, support and engineering.

Full Stack Developer (Billing, ITIL, Observability) | Serasa Experian | Brazil | Mar 2016 - Apr 2021

- Built critical transactional billing platforms with Java, Spring Boot and Angular, adding proactive monitoring with Dynatrace and Datadog to reduce incident resolution time (MTTR).
- Coordinated modernization waves from a legacy .NET portfolio to Angular/Java, migrating or decommissioning 20 critical applications and lowering technical debt.
- Applied Lean Six Sigma Yellow Belt practices to ServiceNow incident, change and problem flows, reducing daily L1 incident volume and speeding resolution through knowledge standardization.
- Led knowledge transfer into the São Carlos operation with documentation and onboarding for internal support teams, reducing dependence on external consultancies.

Support Specialist | Amdocs | Brazil | Jul 2013 - Mar 2016

- Led a 24x7 support squad for a legacy CRM and billing environment in telecom, organizing handovers across India and Brazil, and reduced daily incidents from 300 to 100 with 99.9% uptime.
- Built automation and batch routines in Unix Shell Script and Oracle PL/SQL, and resolved critical L3 production incidents under strict SLAs.

Product Owner | XBot | Brazil | Nov 2010 - Jul 2013

- Led the lifecycle and requirements of robotics and EdTech products, generating R$4 million in revenue across 12 distributed sales and partner teams.

International Consultant | Bernardin Consultants | France / Brazil | Jan 2010 - Dec 2010

- Coordinated market prospecting and financial feasibility for high-tech industries (defense and military aviation), enabling deals between European investors and the Brazilian market.

EDUCATION

Federal University of São Carlos (UFSCar) | 2018 - 2019
Postgraduate (Specialization) in Software Engineering, Web Development, Java and Databases

Centro Universitário Central Paulista (UNICEP) | 2005 - 2011
Bachelor's Degree in Electrical Engineering
